

AI Usage Note

1. Which AI tools did you use?

> i used chatGPT and hermes

2. What did you use them for?

> i used chatGPT to learn about all about the market and what backtest engine is before starting to code and then used hermes to generate codes for me

3. Which important decisions did you make yourself?

> i added the candle design for the result

4. Did you reject or modify any AI-generated suggestions? Why?

> the ai generated codes used a drop down of for clarification which is wrong in my opinion and also a bad experience bombarding users with the options for everything

5. What part of the solution are you most proud of?

> i would say Part 3 — My Design
